## Enterprise Software for Manufacturers

Pilot ERP is a fully integrated ERP software system with Sales & CRM, Manufacturing, Job Costing, Inventory/Warehouse control, Purchasing, AR, AP, Accounting and more. Designed for the Small to Medium sized manufacturer or distributor, Pilot ERP provides all the functionality you would expect to find in ERP packages used by large companies at a fraction of the cost. Avoid high startup and maintenance fees associated with other ERP packages by choosing Pilot ERP!

Inventory	Manufacturing
Bill of Materials	Work Orders
Batch Sizes	Job Costing
Perpetual Inventory	Material and Labor
Lot & Serial Control	MRP
Sales Quoting	Purchasing
Sales Orders	Accounts Receivable
Multi-Currency	Accounts Payable
Shipping	General Ledger
Invoicing	Banking
Sales Analysis	Custom Financials
	More....

The Sales module is where it all begins. Your sales reps have the ability to access real time inventory availability and determine where the order is in production. From Quoting to Order Entry, Shipping to Invoicing, Pilot ERP covers all aspects of the order cycle.

The Inventory module tracks inventory stock levels and costs, allowing you to efficiently manage your finished goods, work-in-process and raw material which is crucial for your operation. Pilot ERP gives you instant access to real-time data so you can track stock levels by item, location, item class and view historical usage right on the inventory screen.

The Manufacturing module tracks manufacturing orders, material (component items) and resource (labour and equipment) requirements, and production costs, prints bills of materials, and passes data to the inventory module.

The Purchasing module is used for material procurement. Pilot ERP makes it easy to buy from the vendors with the best prices and maintain a history of all purchases.

The fully integrated Accounting Module incorporates Accounts Receivable, Accounts Payable, Banking, General Ledger and Financial statements into Pilot ERP allowing you to run your business in one program.
